Invoice Date Mismatch on Printed Customer Invoice – Odoo 18

المرحلة: انتهى

المشروع: المساعدة

الوصف

Phone: +20 102 223 4821

Edition: online

Dbname: edu-hafeez-test1.odoo.com

Version: 18.0+e

?What are the steps to reproduce the issue

.Go to the Accounting app -

.Navigate to Customer Invoices -

- Click Create to generate a new customer invoice -
 - Manually set the Invoice Date to a specific past date (e.g., 01/04/2025) -
 - Fill in the invoice details and Validate the invoice -
 - Click on the Print button to print or preview the invoice -
 - ?What is the current behavior you observe
- The printed invoice shows the current date (print date) as the Invoice Date, instead of the manually set date entered during invoice creation.
- This mismatch appears on the printed PDF version
- ?What would you like the behavior/result to be
- The printed invoice should display the manually set Invoice Date that was entered during invoice creation—not the print date. This is important for consistency, customer communication, and especially for accurate VAT reporting.
